Oakmoss 5 Drops

Patchouli 5 Drops

Benzoin 10 Drops

Vetivert 10 Drops

Cabruera 10 Drops

Sandalwood 10 Drops

Total Drops: 100

→I like making and selling my perfumes as Pure Parfum Extraits, and sell them as 3mL vials. If you'd like to make this as an oil- or alcohol-based fragrance, see below.

To make a 10mL Bottle of Finished Perfume:

**It is best if a certain period of time can be taken to allow this Pure Extract to marry and mature. It is not necessary, but the extra time taken to do this is very much worth the wait.

→It is best if a minimum of 6 months can be taken to mature the composition. If I am short on time, 1-2 days will work; and 2 weeks would be even better.

Oil-Based:

-20-40% of Pure Parfum Extract (roughly 2-4mL or 2-4g is measuring by weight)

-Top off the bottle with carrier oil of choice (roughly 6-8mL or 6-8g)

French-Style Alcohol-Based:

-20-40% of Pure Parfum Extract (roughly 2-4mL or 2-4g is measuring by weight)

-Top off the bottle with a pre-fixed alcohol

-Allow it to marry

-Filter several times through unbleached coffee filters

-Either rebottle for storage, or package in your desired pump-spray perfume bottle

Eau de Parfum (EDP)

Length of Time on the skin: 70% will evaporate by the afternoon

Composition:

Top and Head: 40%
Heart: 30%
Base and Deep Base 30%

Percentage of Oils: 7-22%

Example Formulation:

Top: 40%

Bergamot 40 Drops

Heart: 30%

Ylang 5 Drops
Rose 10 Drops
Jasmine 15 Drops

Base and Deep Base: 30%

Oakmoss 5 Drops
Patchouli 5 Drops
Benzoin 5 Drops
Vetivert 5 Drops
Cabruera 5 Drops
Sandalwood 5 Drops

To make a 10mL Bottle of Finished Perfume:

**It is best if a certain period of time can be taken to allow this Pure Extrait to marry and mature. It is not necessary, but the extra time taken to do this is very much worth the wait.

→It is best if a minimum of 6 months can be taken to mature the composition. If I am short on time, 1-2 days will work; and 2 weeks would be even better.
